# loaded questions<sup>®</sup> on the go

## Welcome!

Whether it's your first time playing Loaded Questions<sup>®</sup> or you're one of the millions of people who have enjoyed our bestselling game, your life is about to be more fun with 200 creative questions designed to spark hilarious and memorable discussion.

## Contents

50 Question Cards (200 Loaded Questions<sup>®</sup>),  
Answer/Score Pad, Two Pencils

## Object

Be the player to fill-in the most amount of bubbles on your answer sheet by matching players' answers correctly on your turn and writing the "favorite" answer on everyone else's turn.

### Set-Up

1. Place the question cards face down in the middle of the play area.
2. All players take an answer sheet and write their name at the top. (Share the pencils or grab more.)
3. Shortest player goes first. Play moves clockwise.

### On Your Turn...

1. Pick the top card and read aloud any one question.
2. All other players (not you) secretly write their personal answers to the question (neatly) on their answer sheet. **There are no right or wrong answers!**
3. All answers are collected, shuffled and read aloud by the player to your right. (You will not see the handwriting, because the player to your right is reading the answers aloud.) After hearing **ALL** of the answers, you must **FIRST** pick your favorite answer and **THEN** guess which player wrote which answer.
  - The reader should familiarize himself/herself with the answers before reading them aloud.
  - It helps to hear the question again before answers are read aloud.
  - Whether you like an answer because it was hilarious, honest, creative or ridiculous, it is up to you in deciding your "favorite".

- Players should be discreet when answers are read aloud, and when you are selecting your favorite answer and guessing "who wrote what".

4. The player to your right reveals which player wrote which answer. You fill-in one bubble at the top of your answer sheet for every correctly matched answer. The player who wrote your favorite answer fills-in two bubbles. That signals the end of the turn and play moves clockwise.

### How To Win

In a 4-5 player game, the player with the most bubbles filled-in after three full rounds of play wins. (A full round means all players have one turn.) In a 6-player game, the player with the most bubbles filled-in after two full rounds of play wins. If there is a tie, then 2+ players share the win.

### Notes On Play

- There are no right or wrong answers. Just write neatly!
- Players will decide how long players have to write and guess answers.
- Place used cards at the bottom of the card deck.
- Add the enclosed cards to our bestselling Loaded Questions® board game for hours of fun!
